Colored and white plaster Pool Interior Finishes are composed of materials which may have inherent shading and/or color variation which is normal and should not be construed as a defect. Due to environmental factors such as humidity, temperature, etc., during the installation process, normal color variation within a surface coating, also called normal mottling, which is generally uniform shading, blotchy or cloudy appearance across the surface of a cementitious surface coating may appear, this is out of the contractors' and manufacturers' control. Exact representation of product colors is not possible to replicate in print. Contact us for product samples.
